

PARADOX

PARADOX

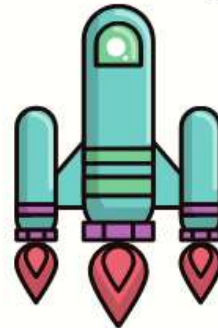

5th century BCE

The Ship of Theseus Paradox: This thought experiment questions whether a ship that has had all its parts replaced over time is still the same ship.

4th century BCE

Zeno's Paradoxes: Zeno of Elea proposed several paradoxes, including the Dichotomy Paradox and the Achilles and the Tortoise Paradox, challenging our understanding of motion and infinity.

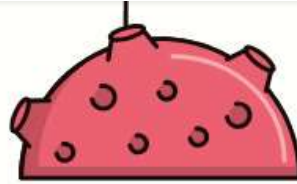

17th Century:

The Barber Paradox: This paradox raises questions about self-reference and whether a barber can shave himself if he only shaves those who do not shave themselves.

PARADOX

discovered this paradox in set theory, which questions whether there can be a set of all sets that do not contain themselves.

**21st Century:**

The Simulation Hypothesis: A modern philosophical idea suggesting that our reality could be a computer simulation, raising questions about the nature of existence and reality.
