
PARADOX

THE PURPOSE OF PARADOX

Orthodox Christianity is deeply associated with the word "mystery." Its theological hymns are replete with paradox, repeatedly affirming two things to be true that are seemingly contradictory. Most of these things are associated with what is called "apophatic" theology, or a theology that is "unspeakable."

This same theological approach is sometimes called the Via Negativa. This is easily misunderstood in common conversation. An Orthodox discussion takes place and reaches an impasse. Inevitably, someone will remind us that some things are simply a "mystery," etc.

HAWKING'S RADIATION

HAWKING

Hawking radiation describes hypothetical particles formed by a black hole's boundary. This radiation implies black holes have temperatures that are inversely proportional to their mass.
